

## Is "Nature's Miracle Medicine" The Real Deal... Or Just Another Gimmick?

**It's important to understand that CBD isn't just for those that have medical conditions.** Healthy people can greatly benefit from using CBD as part of a preventative health plan, because it can aid in the promotion of quality sleep, help reduce stress and anxiety, and act as a natural anti-inflammatory agent.  
And, as you are probably aware, inflammation is the root of all disease

CBD has been called "Nature's Oxycontin" because it **quickly relieves even the most agonizing pain** and reduces inflammation allowing the body to finally heal.

Millions of Americans are already using Pure CBD on a daily basis.

**Many say it works like magic.** Some say it works better than prescription painkillers like Vicodin and Oxycontin.

Here at Fox News, we received hundreds of emails about whether Pure CBD is a legitimate alternative to potent painkillers, and if it carries any unwanted side effects. We wanted to find out...

### Is "Nature's Miracle Medicine" The Real Deal... Or Just Another Gimmick?

Mary had been battling horrible arthritis pain for years, which she was barely able to control.

Enduring this mind-numbing pain was bad enough but what happened next was nothing short of a nightmare.

Without warning...

**Mary suffered two major strokes in 67 days!**

Miraculously, Mary survived, but her arthritis raged hopelessly out of control as a result of the strokes.

Doctors pumped her full of their strongest drugs, but her pain sprang to unbearable levels.

Desperate for relief, Mary began looking for answers on her own.

Twelve agonizing months later, she stumbled upon a **surprising pain remedy used by ancient healers**.

Mary was surprised the major ingredient turned out to be concentrated Cannabidiol extracted from the marijuana plant (**CBD**).

Mary was astonished. This discovery changed her life- literally overnight.

The formula seemed to melt away the pain -in her words - "just like it was never there.

Congress introduced a new federal bill in spring 2017 to reschedule marijuana and CBD as a schedule III substance, meaning **CBD could be freely distributed for medical and research purposes!**

So, a research grant was approved to run the first ever **FDA approved clinical trial involving CBD**.

**Harvard researchers and medical doctors**, led a clinical trial studying the effects of CBD on pain and inflammation.

The results were astonishing. Through their research, they discovered a multitude of other health benefits of CBD they never anticipated. Richardson's team ran additional follow-up studies that concluded CBD is nothing short of a real medical miracle.

## CBD has now been clinically proven to:

- • **Reduce pain** by binding to CB1 receptors while reducing swelling
  - • Reduce social anxiety, cognitive impairment, and discomfort in patients diagnosed with Generalized Social Anxiety Disorder (SAD)
  - • **Fight cancer** spread by "turning off" genes involved in tumor development
  - • Combat neurodegenerative disorders like Alzheimer's by removing plaque that block neuron-signaling
  - • Reduce cigarette addiction by modulating the rewarding the effects of nicotine
  - • **Improve sleep quality** and restore respiratory stability to those experiencing sleep Apnea
  - • Provide relief to those suffering from IBD (Chron's or Colitis) through its anti-inflammatory effects
  - • **Help Prevent obesity** Users report CBD helping reduce cravings and avoid over-eating, often leading to weight loss
- 

But research shows its benefits go much further than just that. For example, if you'd like improved sexual health... research shows that CBD may help with:

- • erectile dysfunction,
- • infertility,
- • menstrual pains, and
- • overall sexual performance

If you want improved mental health... CBD is commonly used to treat physiological symptoms, it has also been deemed an effective treatment for:

- • anxiety,
- • depression,
- • stress,
- • ADHD/ADD, and
- • PTSD (*Post-Traumatic Stress Disorder*)

CBD also enhances concentration and focus... PLUS it can enhance and improve sleep.

**CBD has also been proven:**

- • To be highly beneficial in the treatment of seizures, neurological conditions such as MS and cerebral palsy, and anxiety disorders
  - • Studies have found that CBD can relieve nausea and vomiting, making it a great digestive aid
  - • It can help fight tumors and cancer cells because it's a very powerful antioxidant
  - • CBD can help relieve anxiety and depression, calm and protect the nervous system
  - • It can promote relaxation and deep sleep, help reduce stress, help relieve insomnia
  - • CBD is a natural anti-inflammatory which helps reduce swelling and also can help reduce muscle and joint pain
- 

So, as you can see, CBD can play a helpful role in helping relieve many of these health challenges.

But there's one important fact you need to understand about CBD:

**Unlike marijuana, CBD is 100% legal everywhere in the world, is completely safe and is non-addictive** – and offers many of the same benefits of marijuana without the high, which comes from the THC, the other prominent compound found in marijuana.

The main difference between THC and CBD is that the THC (*tetrahydrocannabinol*) is the *compound in the marijuana plant that does make you feel high*. In fact, it can make you feel really high.

One of the primary reasons CBD is being so widely discussed is the fact that it, unlike THC, won't cause any intoxication. *Since intoxication in medical use is an unwanted side effect, CBD seems ideal.*

**It's important to understand that CBD isn't just for those that have medical conditions.**

Healthy people can greatly benefit from using CBD as part of a preventative health plan, because it can aid in the promotion of quality sleep, help reduce stress and anxiety, and act as a natural anti-inflammatory agent. And, as you are probably aware, inflammation is the root of all disease.

Even better, there are no scientific studies to date showing any negative side effects of consuming cannabidiol regularly. **CBD has actually been extensively studied and proven to have only positive effects.** This is part of why taking it is so appealing.

***"You Want to Be Careful About What  
You Put Into Your Body"***

As is the case with all health supplements, it's important to consider:

- 1. 1. The Source Quality of the CBD (*i.e. where it comes from*)**
- 2. 2. The Extraction Process of the CBD (*how the CBD oil is prepared*)**
- 3. 3. The Handling + Storage of the CBD**
- 4. 4. The Manufacturing Methods + Concern for Purity**

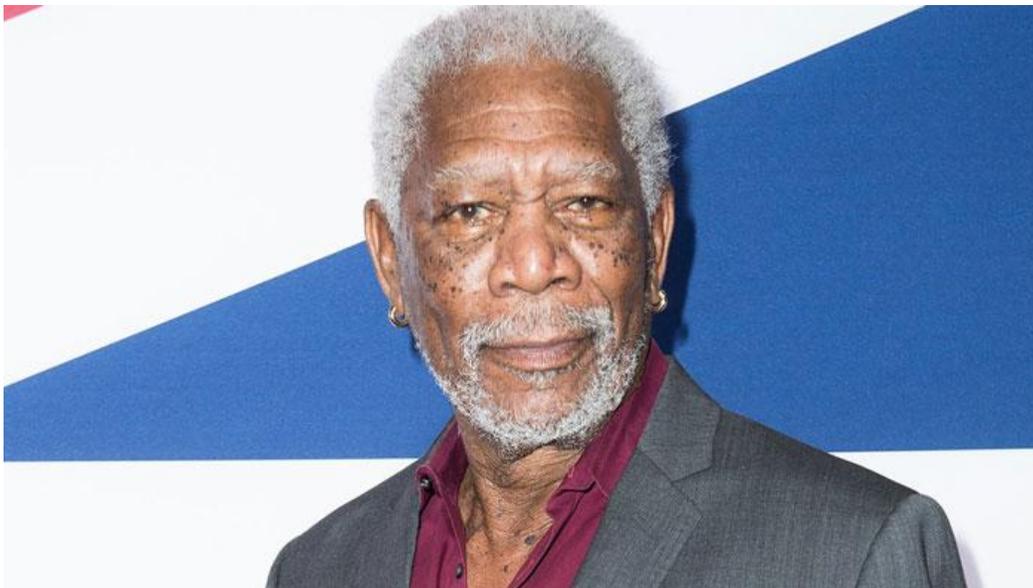

Unfortunately, around 90% of supplements on the market today are ineffective and a complete waste of money because they simply aren't made from quality ingredients, or they have poor extraction methods, making them useless and sometimes even dangerous.

It is recommended you find a CBD that's all-natural, water-soluble, CO2-extracted, triple tested for purity and sourced from organic cannabis. You can find just such CBD here:

---

Eventually, Hollywood celebrities started trying CBD for their ailments, and once they saw how well it worked, they started spreading the word to millions of fans.

**Morgan Freeman: "The Only Thing That Offers Relief For Fibromyalgia is CBD"**

## Jennifer Aniston: "I Enjoy Using CBD And Wish More People Knew The Benefits"

Even The Sharks jumped on the opportunity to invest in CBD with confidence, calling it the...

### ["Natural Miracle Cure That Will Bring Down Big Pharma"](#)

Yet here at Fox Health, we needed more proof **CBD** is really the miracle cure it claims to be.

Last month, our senior editor Taylor Wellington volunteered for our experiment. Taylor was chosen because of her history with Rheumatoid Arthritis, a painful autoimmune condition doctors don't yet have a complete cure for.

**Below is her story...**

**Taylor's Real Life Experience With CBD**

"My name is Taylor and I'm a 49-year-old mother of three from Alabama. I have a history of anxiety attacks and chronic arthritis, which has prevented me from living a normal life. On top of that, I accidentally slipped on our family vacation a few years ago and have been experiencing chronic back pain ever since.

Since my diagnosis, I tried various exercises for my back pain. I spent hours every day meditating to help with my anxiety attacks. I was even given a high dose of Vicodin to help manage my pain, but they made me nauseous, foggy headed and always craving for more.

I tried natural supplements but none of them worked. I tried various therapies like massages, chiropractic adjustments and acupuncture yet those didn't help either. At one point, I was even considering a \$5,000 surgery! But I read about horrible side effects from others online. Plus, I couldn't afford to dig myself deeper into financial debt. So I decided to keep searching.

One day, while watching an episode of The Doctors, I heard Dr. Travis Stork talk about a natural solution to pain management and inflammation that's even more effective than prescription meds. Of course, the solution was CBD..

# ENTUNE™

*Full-Spectrum Hemp-Derived CBD Oil Squares*

- Promotes a general sense of well-being
- Helps encourage calm, collected feelings
- Combines CBD with key botanicals for enhanced benefits
- Provides CBD to support normal cannabinoid receptor function

30

Dual Release Transdermal Squares (16.5 mg ea.)

**KEY INGREDIENTS:**

Hemp CBD Oil

---

Water-Soluble  
Hemp CBD Powder

---

White Willow Bark

---

Cat's Claw

---

CoQ10

DUAL RELEASE  
**24**  
HOUR  
DUAL RELEASE

At first, I was hesitant because I didn't want to get "high" but through more research, I discovered CBD has no psychoactive effects, so I can function as normal.  
So I decided and give it a shot.

Within a few weeks, my pain completely disappeared and my normal panic attacks began to subside. I was amazed! Most of all, my back pain was much better and I was even able to take my 3-year-old son in my arms for a walk for the first time in years! I not only saved thousands of dollars, but also the hassle of doctor visits and therapy sessions.

### **Will CBD Patch Work For You?**

CBD is absolutely safe and legal in all 50 states. You can skip the long wait for wallet-draining doctors appointments and the frightfully addictive pills and opioids

Don't wait, the demand for CBD is growing by the day. People are figuring out that not all CBD products are equal. And as they discover it – they want it, and they want it now.

Inside many of the online forums – We've seen people willing to pay an arm and a leg for **CBD**  
**Some have even offered as much as \$500 for the real deal.**

So, don't put this off. Do it now... and why wouldn't you – especially since you're back by a 100% money-back guarantee?

### **Recent Testimonials**

I have a very physical job. Rich gave me this exact CBD patch for a pinched nerve. I swear it's a miracle.

I wore 1 patch for 2 days straight and now very little to no pain. Fingers no longer

numb. I also slept very well and calm. Amazing stuff!

Sue. R. Manchester, Ct.

I bought these patches from the Immortal Opulence web-site. It says wear one patch per day but 1 patch actually lasts about 2 days so the 1 box lasts almost 2 months. I work in health care and am always bending, so my lower back and shoulders are in pain. These patches are a godsend. My pain is all but gone and I feel a sense of calm during the day. I will be purchasing more. This is the real deal. Recommended.

Barbara. B. Old Wethersfield, Ct.

As a side note myself and my 86 year old mother use the patch too. We all love it. Many individuals find, one patch can last up to 2 days so it becomes very affordable for this kind of relief. My Mom has knee pain and she claims the patch took her pain away dramatically. She now walks about a mile a day unassisted. I myself have had shoulder pain and that too is all but gone plus it gives me a happy positive outlook.
